

COVID-19 In-School Testing Program

Today your child was tested in school for COVID-19 by a medical professional from BioReference Laboratories. In-school testing is an important part of our work to keep you, your child, and your school staff safe and healthy.

What's happens next?

You will be contacted by telephone or email with your child's test results at the phone number or email address provided. The majority of test results will come back in about 48 hours.

If your child tested positive for COVID-19:

- Someone from BioReference Laboratories will call you, if you provided a telephone number, between the hours of 7AM-8PM.
- You will also receive a call from the [NYC Test & Trace Corps](#), who will offer resources and recommendations. They can guide you on next steps, including what you may need to be able to keep your child at home.

If your child tested negative for COVID-19:

- You will receive an email with your child's results if you provided one.

If you do not receive your child's results report after 3 days, please contact BioReference Laboratories at patientportal@bioreference.com with your child's name, date of birth, and the date the test took place, and reference the "NYC Schools COVID-19 Testing Program."

The privacy of our students and staff is a top priority, and all information relating to COVID-19 testing and your child is strictly confidential.

If you have any other questions, please visit www.schools.nyc.gov/covidtesting or call 311. Thank you for participating in COVID-19 In-School Testing and helping to keep your school a safe and healthy environment.
